

Partners in Paediatrics (PIP) Paediatric Guidelines App

“Paediatric Guidelines You Can Trust—Reviewed, Updated, Reliable.”

Introducing the **10th Edition** of the Partners in Paediatrics (PIP) Paediatric Guidelines App—**replacing the printed book** we previously produced. This trusted and comprehensive resource provides paediatric clinical guidelines designed specifically for paediatricians, trainees, and healthcare professionals. The app offers instant access to evidence-based guidance that supports safe, effective, and informed clinical decision-making.

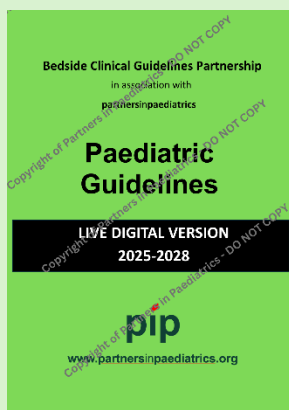

What sets the PiP Paediatric Guidelines App apart?

Unlike many resources that remain static after publication, our guidelines are continuously reviewed and updated by an extensive panel of expert authors. Each guideline undergoes a rigorous, multi-step review process before being published, ensuring accuracy, reliability, and adherence to best practice standards. This commitment to ongoing review makes the PiP Paediatric Guidelines App one of the most robust and dependable sources of paediatric guidance available.

With an intuitive interface and comprehensive coverage, the PiP Paediatric Guidelines App is your essential companion for delivering high-quality paediatric care—anytime, anywhere.

***Free for PiP members** and available at a **competitive cost for others**.

Download today and experience the confidence of having trusted expertise at your fingertips!

PIP Members, Instructions for use:

Download from your App provider as appropriate:

ANDROID PLAY STORE: [CLICK HERE](#)

APPLE IOS: [CLICK HERE](#)
